About Angion Biomedica Corp.

Angion is committed to transforming the treatment paradigm for patients suffering from fibrotic diseases for which there are no approved medicines or where existing approved medicines have known limitations. Angion's lead product candidate is ANG-3070, a highly-selective oral tyrosine kinase receptor inhibitor in development for the treatment of fibrotic kidney and lung diseases. Enrollment is ongoing in JUNIPER, a dose-finding Phase 2 trial of ANG-3070 in primary proteinuric kidney diseases (NCT04939116). Additionally, Angion has preclinical programs focused on rho kinase 2 (ROCK2) inhibition and CYP11B2 (aldosterone synthase) inhibition. For more information, please visit www.angion.com.
